## PROFESSIONAL PROFILE

Experienced Python developer with a strong background in software development and a passion for solving complex problems. Skilled in a wide range of technologies, including Python SQL and Linux.

## SKILLS

- 
- Python & Python scripting
  - SQL and NoSQL
  - linux and bash scripting
  - Numpy
  - Pandas
  - Django
  - Flask

## PROJECTS

### Expense-tracker

- Developed and maintained a mobile Portfolio manager using Termux-AP! I have gained experience in using the datetime, os, subprocess, json, and re module as well as the BlockingScheduler class from the APScheduler library. Demonstrated proficiency in using regular expressions to extract information from strings and made perfect use of the while loop to continually check for a certain condition.

### Content Aggregator

- Content Aggregator made with Django. I have gained experience in using the Django framework to build a web application and integrate it with a database using the Django ORM. I have also gained knowledge in working with RSS feeds and using the feedparser library to extract and parse data from them. I have experience in creating custom management commands in Django and using the django-apscheduler library to schedule tasks to run automatically. Additionally, I have gained experience in implementing unit tests to test the functionality of my Django app. Overall, this has provided me with a comprehensive understanding of building a content aggregator with Python and Django.

## **EDUCATION**

University of Ibadan, **B.Sc. Petroleum Engineering**

**2017 – 2022**
